Assignment-5 Interprocess Communication

Try to get your partner's IP address and make your client send a message to his/her server. Are you able to send the message? If not, why is that? What do you need to do to make it work? Support your answers with screenshots

We had trouble getting our client/server to send packets to each other but after disabling windows firewalls, ensuring the desired ports were open allowing all connections and connecting to the same hotspot we found some success.

```
C:\Users\Alex Melford\Documents\CSULB\Fall 2022\327\327-assignment5\PRJ5>javac Client.java && java Client
Enter IP address:
10.7.69.28
Enter Port:
6017
